

PART II

1. You will build your own buffer around this stream.
2. The farmer said he doesn't want to lose any farmland, but you can move his farm 100 feet away from the stream.
3. The owners' of the house and the store said you cannot move their property, but you can build a buffer next to their property.

- * The picture below is the same as the picture shown before, except the farmland is missing.
- * You must draw the three buffer zones around this stream and draw the new location of the farm 100 feet away from the stream.
- * In the spaces below, describe how each buffer zone protects the stream and Atlantic salmon from pollution.

Legend: 100 feet
